

Microsoft – AI - Services - References - Blogs Links-Noted

Here's a **curated, 2025-updated resource list** (blogs, tutorials, labs) for Microsoft Azure AI Services. These are recent, relevant, and aligned to current Azure AI developments.

2025-Updated Resource List for Microsoft Azure AI Services

1. Blogs & Articles

1. **Learn how to develop innovative AI solutions with updated Azure skilling paths**
 - Microsoft Developer Community Blog — describes the refreshed Microsoft Learn “Plans” for generative AI, AI Foundry, prompt-engineering, lifecycle management, and more.
 - [🔗 \(TECHCOMMUNITY.MICROSOFT.COM\)](https://techcommunity.microsoft.com)
 2. **What's new in Azure AI Services (November 2025)**
 - Microsoft Learn documentation page highlighting the latest additions to Azure AI services (e.g., custom translation, voice live API, PII entities).
 - [🔗 \(Microsoft Learn\)](https://learn.microsoft.com)
 3. **What's new in Azure AI Foundry | June 2025**
 - Azure AI Foundry blog: introduces new Foundry project structure, unified SDK, “latest / preview” API versioning, voice-live API, safety leaderboards, and more.
 - [🔗 \(Microsoft for Developers\)](https://microsoft.com/ai-foundry)
 4. **Accelerate your career growth with our latest Cloud and AI Skilling resources**
 - Skills Hub Blog by Microsoft (May 2025): new structured learning plans, virtual training days, and other skilling resources for AI + Azure.
 - [🔗 \(TECHCOMMUNITY.MICROSOFT.COM\)](https://techcommunity.microsoft.com)
 5. **AI-powered success—with 1,000+ customer transformation stories**
 - Microsoft Cloud Blog (July 2025): real-world use cases of Azure AI (especially Azure OpenAI) in business transformation.
 - [🔗 \(Microsoft\)](https://microsoft.com)
-

2. Tutorials, Learning Paths & Labs

1. **Azure OpenAI / Generative AI Learning – Microsoft Learn (AI Show)**
 - A live / recorded “AI Show” series that explores how to build generative AI solutions using Azure OpenAI.
 - [🔗 \(Microsoft Learn\)](https://learn.microsoft.com)
2. **Take your generative AI skills to the next level with Azure**
 - Microsoft Community Hub article: provides links to learning modules, the 12-lesson “Generative AI for Beginners” series, prompt-engineering guidance, and using Azure AI Studio.
 - [🔗 \(TECHCOMMUNITY.MICROSOFT.COM\)](https://techcommunity.microsoft.com)
3. **AI-900 & AI-102 Training – No-Cost and Official Microsoft Paths**
 - While not always “new,” Microsoft continues to promote free / low-cost labs and study guides for foundational (AI-900) and engineer (AI-102) certifications.
 - Example: AI-102 course syllabus (Python / C#) — AI-102T00 PDF from Microsoft workshop: [🔗](#)

- Thanks to a 2025 update, all AI-Engineer labs (AI-102, AI-3002, 3003, etc.) now use **Python only**, simplifying maintenance and alignment with Azure SDKs. ([TECHCOMMUNITY.MICROSOFT.COM](https://techcommunity.microsoft.com))
4. **AI Study Guide: No-Cost Tools from Microsoft**
- Azure Blog: gives a guide to using Azure AI Studio, Azure OpenAI, sample projects, and prompt engineering—all for free or low cost.
 -  ([Azure](#))
-

3. Research & Technical Papers

These are more technical but very relevant to advanced Azure AI topics, especially for enterprises, researchers, and system architects:

1. **From Search to Reasoning: A Five-Level RAG Capability Framework for Enterprise Data**
 - Presents an advanced framework for Retrieval-Augmented Generation (RAG) in enterprise systems, comparing platforms including Azure AI Search + OpenAI.
 -  ([arXiv](#))
 2. **Cost-Effective, Low Latency Vector Search with Azure Cosmos DB**
 - Research paper (2025) on implementing vector search inside Azure Cosmos DB, which can be very useful for embedding-based retrieval / semantic search.
 -  ([arXiv](#))
 3. **An Empirical Study of Production Incidents in Generative AI Cloud Services**
 - Analysis of reliability and production safety challenges in large-scale GenAI deployments (e.g., Azure OpenAI).
 -  ([arXiv](#))
-

4. Video / Workshop Resources

1. **Complete Generative AI With Azure Cloud Open AI Services (Crash Course)**
 - YouTube: by Krish Naik, covers GPT, DALL·E, embeddings, RAG chatbots, function calling, fine-tuning, and more.
 - 

[Complete Generative AI With Azure Cloud Open AI Services Crash Course](#)

2. **Getting Started with Generative AI using Azure OpenAI Service**
 - A Microsoft Build-style talk introducing GPT-3.5 / GPT-4, Codex, and how to build real-world applications.
 -  ([YouTube](#))
-

How to Use These Resources Effectively (2025 Strategy)

- **For Learning / Certification:** Start with the Microsoft Learn AI Show and the generative AI beginner course, then move to AI-102 training for certification.
- **For Hands-on Building:** Use the AI Study Guide along with Azure AI Studio and the labs in Microsoft Learn.
- **For Architecture / Research:** Dive into the technical papers (RAG framework, vector search) to design robust enterprise systems.
- **For Staying Updated:** Regularly follow Azure AI Foundry blog and “What’s new” docs, since Azure AI services are evolving quickly.
