

Resources - Microsoft Azure AI Services

Here is a **detailed list of high-quality resources (with links)** to learn **Microsoft Azure AI Services** — including documentation, learning paths, GitHub repos, and videos.

1. Official Documentation & Reference

- **Azure AI Foundry Documentation**
Microsoft's main hub for Azure AI Services (formerly Cognitive Services) — includes concept guides, quickstarts, and how-tos.
↪ <https://learn.microsoft.com/en-us/azure/ai-services> (Microsoft Learn)
 - **Microsoft Learn – Introduction to AI in Azure**
A beginner-level learning path covering AI concepts and Azure's AI services (vision, speech, NLP, generative AI).
↪ <https://learn.microsoft.com/en-us/learn/paths/get-started-with-artificial-intelligence-on-azure/> (Microsoft Learn)
 - **Microsoft Learn – Azure AI Fundamentals**
Focuses on core AI ideas, Azure's AI tools, and how to start building simple AI solutions. Good foundation especially if you plan to take the **AI-900** exam.
↪ <https://learn.microsoft.com/en-us/training/paths/get-started-with-artificial-intelligence-on-azure/> (Microsoft Learn)
-

2. GitHub Repositories / Sample Code

- **Azure OpenAI Samples (Official)**
A community-backed repo with code samples for using Azure OpenAI — includes GPT use cases, retrieval-augmented generation (RAG), LangChain, Prompt Flow, etc.
↪ <https://github.com/Azure/azure-openai-samples> (GitHub)
- **Azure Samples – Azure OpenAI + Foundry**
This repo includes agent-based architectures and more advanced usage of Azure AI models (OpenAI, Foundry) for building generative apps.
↪ <https://github.com/Azure-Samples/openai> (GitHub)
- **Azure Search + OpenAI Demo (Python & other languages)**
A demo app that shows how to use the Retrieval Augmented Generation (RAG) pattern using Azure Cognitive Search + Azure OpenAI.
↪ <https://github.com/Azure-Samples/azure-search-openai-demo> (GitHub)
- **Azure Search + OpenAI Demo (C#)**
Same RAG pattern, implemented in C# (.NET), showing chat with your own data.
↪ <https://github.com/Azure-Samples/azure-search-openai-demo-csharp> (GitHub)
- **Azure Communication Services + AI Customer Service**
A sample customer-support application using Azure Communication Services, Azure Cognitive Search, and Azure OpenAI to build voice + chat bots.
↪ <https://github.com/Azure-Samples/communication-services-ai-customer-service-sample> (GitHub)
- **Azure Communication Services + OpenAI Call Agent Sample**
Demonstrates how to use OpenAI models during a live voice call using Azure

Communication Services.

↗ <https://github.com/Azure-Samples/communication-services-openai-sample> (GitHub)

3. Video Learning Resources

[Intro to Azure AI \(Microsoft Events\)](#)

- **“Intro to Azure AI | LRN103”** — Microsoft Events on YouTube
Great for understanding what Azure AI is, what services are available, and how to begin.
 - **“AZ-900 Episode 16 | Azure Artificial Intelligence (AI) Services”** — by Adam Marczak
Provides a beginner-friendly overview of Azure AI and how AI services tie into Azure’s bigger picture.
↗ <https://www.youtube.com/watch?v=8aMzR8iaB9s> (YouTube)
-

4. Additional Resources & Community

- **Responsible AI Guidance**
In the Azure AI Foundry docs, there is a section on “Responsible use of AI” — important for governance, safety, and ethics.
↗ Check under the AI Foundry documentation. ([Microsoft Learn](#))
- **Reddit Discussions**
 - Overview of Azure AI Services: people on r/AZURE discussing how the different Azure AI services compare. ([Reddit](#))
 - API reference discussion: someone sharing where to find swagger / API reference for Azure AI services. ([Reddit](#))
 - AI-102 certification study tips: real experiences from those who passed the **Azure AI Engineer Associate** exam. ([Reddit](#))
